Statement of Nonviolence

Whereas, the employing class has historically subjugated the working class for the sake of the vested interests of the former, especially with violence, and

Whereas, the working class has always most effectively resisted the terms of our exploitation by organizing as a class for our mutual benefit, and

Whereas, faced with the power of united workers, the employing class has generally resorted to the tool of organized violence and its subsequent terror for the means of repressing the working class into subjugation, against a more common interest, and further

Whereas, the employing class has always tried to lay the blame for their crimes of violence at the door of the workers thus exploited, and

Whereas, contrary to the norms of society of the employing class, the IWW has historically articulated its vision as an effective, protective alternative to violence and its social illnesses,

Therefore be it resolved that the East Bay General Membership Branch of the Industrial Workers of the World reaffirms that nonviolent nature of the alternatives we propose, and are building, to counter the pernicious and at root, violent evils on a society based on the exploitation of the many for the benefit of the few;

Furthermore, be it resolved that violence is to be defined as any act of an unprovoked, premeditated, or physical nature that is intended to cause physical harm to any other person or persons, and

Furthermore, be it resolved that this statement shall not be construed to deny or disparage, nor mistaken as the forfeiture of our inherent right to self-defense by whatever means necessary against a direct attack on our lives and/or limbs.
